CF *version with stiffness-adjusting shock absorbers*

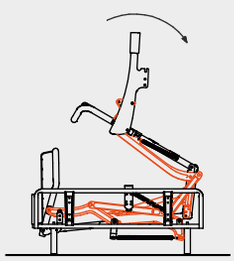

SCILLA
P13 COMFORT
COM 35

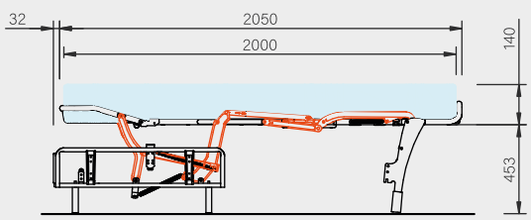

The Scilla Comfort mechanism combines modern sleep needs with the versatility of a sofa bed by means of an anatomical system that adapts perfectly to the body's curves. It features shock absorbers equipped with stiffness regulators with two different configurations, SOFT and HARD. This allows for customisable lumbar support. By simply turning the support, the level of firmness can be adjusted to adapt the bed to individual sleeping preferences. This version with a 13 cm foot can accommodate a polyurethane mattress up to 14 cm thick and up to 200 cm long. Minimum opening and closing effort thanks to its perfectly balanced movement.

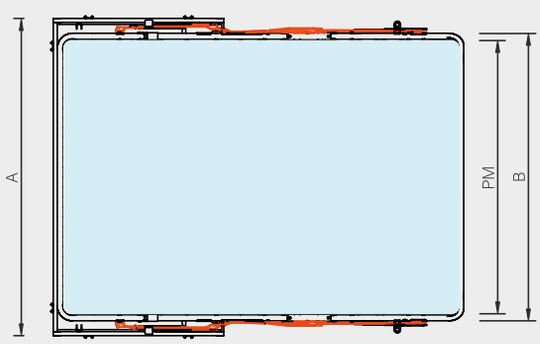

Il meccanismo Scilla Comfort coniuga le nuove esigenze del riposo con la versatilità di un divano letto attraverso un sistema anatomico che si adatta perfettamente alle curve del corpo. Presenta ammortizzatori dotati di regolatori di rigidità con due diverse configurazioni, SOFT E HARD. Ciò permette un sostegno personalizzabile nella zona lombare. Con una semplice rotazione del supporto, è possibile differenziare il grado di rigidità per adattare il sistema letto alla propria posizione di riposo. Questa versione con piede da 13 cm può contenere un materasso in poliuretano alto ben 14 cm e lungo fino a 200 cm. Minimo sforzo di apertura e chiusura, grazie alla sua movimentazione perfetta-mente bilanciata.
